

TECH DAY 2024

The Industry Empowerment Cell (IEC) organized the Tech Day (Project Expo) on November 15 and 18, 2024, providing an excellent platform for engineering students from all years to showcase their innovative projects. The event aimed to nurture creativity, problem-solving abilities, and technical proficiency while fostering a culture of entrepreneurship and innovation within the institution. Students had the opportunity to present their ideas, receive constructive feedback, and demonstrate their skills in addressing real-world challenges.

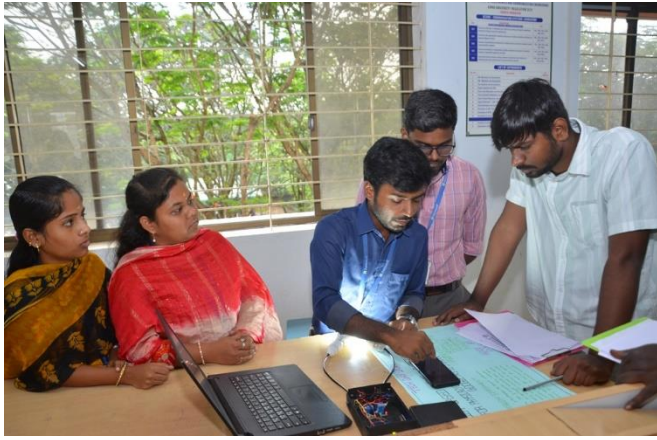

The event was graced by an esteemed panel of jury members who played a pivotal role in evaluating the projects and guiding the participants. The jury included Gokul K, a web and software developer from Phinesphere, who brought his technical expertise to assess the software-related projects; Prasanna Kumar, CEO of Nedunal Yaanai Upscale Solutions, who evaluated the projects from a business and scalability perspective while sharing his entrepreneurial insights; and Nallathambi E, a digitalization enthusiast specializing in TQM, who provided valuable feedback on how to enhance the projects for industrial applications. The presence of such accomplished industry experts elevated the event's significance and inspired the participants.

The Tech Day saw enthusiastic participation from first-year to final-year students. Diverse projects across disciplines, including IoT, robotics, artificial intelligence, and sustainable technology, were showcased. The projects were evaluated based on their innovation, technical feasibility, societal impact, and presentation quality.

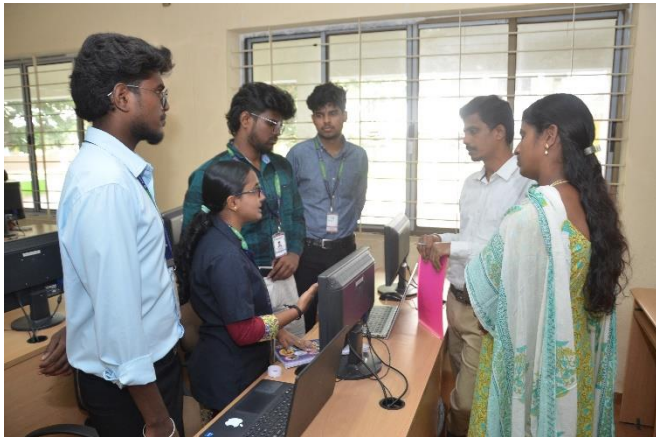

The event fostered collaboration among students, faculty, and coordinators while motivating participants to push the boundaries of their knowledge and creativity. The jury's insights and constructive feedback played a critical role in helping students refine their ideas and explore practical applications of their work. The projects presented reflected the high caliber of talent and technical expertise within the institution, encouraging a hands-on approach to learning and entrepreneurship.

Tech Day 2024 was a resounding success, achieving its objective of promoting innovation and entrepreneurship among engineering students. The IEC extends its heartfelt gratitude to the jury members, department coordinators, and participants for their active involvement and contributions. This initiative has further solidified the institution's reputation as a hub of innovation and technical excellence, and we look forward to organizing more such events in the future.
